ABOUT ME

Engineering educator, founder, and software engineer focused on building practical technology that solves real-world problems. I design educational platforms, mobile applications, and digital systems that improve how people learn, work, and collaborate. My background in psychology, project management, and education informs a user-centered approach to both product development and instructional design.

SKILLS

Languages

Python, JavaScript, SQL, Java, Dart, Swift

Frameworks & Libraries

Flutter, React, Next.js, Tailwind CSS

Cloud & Backend

Firebase, Netlify, Vercel, GitHub REST API, REST APIs, GitHub OAuth

Developer Tools

Git, Github, VS Code, Figma, XCode

Software Engineering

Mobile Application Development, Web Application Development, API Integration, Responsive Web Design, UI/UX Design, Software Architecture, Product Strategy

Education & Leadership

Curriculum Development, Engineering Education, Project-Based Learning, Instructional Design, Project Management, Cross-Functional Leadership

CERTIFICATION

Project Management Professional (PMP)

Microsoft Azure Fundamentals

ITIL Foundations

EDUCATION

MERCER UNIVERSITY

MAT P-12 EDUCATION (ENGINEERING)

Expected Dec 2026

GEORGIA SOUTHERN UNIVERSITY

M.ED School Psychology

2015

EXPERIENCE

ENGINEERING TEACHER

Fulton County School System | July 2026 -Present

- Teach Georgia Engineering & Technology pathway courses using project-based learning.
- Advise the Technology Student Association (TSA), preparing students for engineering competitions and leadership opportunities.
- Design hands-on engineering experiences spanning mechanical, civil, electrical, biomedical, and manufacturing concepts.
- Develop industry-aligned curriculum emphasizing engineering design, collaboration, and problem solving.

FOUNDER & CEO

AlignPlay | May 2026 -Present

Building a standards-aligned educational technology platform designed to help teachers deliver engaging learning experiences while providing meaningful student performance data.

- Lead product vision, roadmap, and business strategy.
- Architect and develop the platform using Next.js, React, Firebase, and Tailwind CSS.
- Design the user experience for teachers, students, and school administrators.
- Build classroom tools focused on instructional impact, scalability, and ease of use.

FOUNDER & SOFTWARE ENGINEER

Grit & Flow Labs | Oct 2025 -Present

Founded an independent software studio focused on creating practical mobile and web applications that solve everyday problems in education, healthcare, and productivity.

- Lead software architecture, application development, UI/UX design, branding, testing, deployment, and long-term product maintenance.
- Manage the complete product lifecycle from concept through release across multiple applications.
- Publish and maintain applications on the Apple App Store and Google Play.

Selected Products

- DocReady – Personal health tracking application available on the Apple App Store and Google Play.
- VetReady – Pet health management application available on the Apple App Store and Google Play.
- DocReady Community Access – Community-sponsored version of DocReady created to expand access for organizations and outreach initiatives.

EXPERIENCE

COMPUTER SCIENCE TEACHER

DeKalb County School District | Feb 2025 - May 2026

- Lead and manage four instructional departments, providing curriculum leadership, coordinating initiatives, and supporting teacher development.
- Facilitate weekly professional learning meetings, oversee departmental supply planning, and collaborate with school leadership to strengthen cross-departmental programs.
- Design and teach online and blended courses using Google LMS and supporting student achievement.
- Guide students through Python, Java, and JavaScript projects, reinforcing computational thinking and collaborative problem-solving through project-based learning.

POS & E-COMMERCE IMPLEMENTATION STRATEGIST

Courier Plus Inc | Oct 2023 - Oct 2024

- Delivered training and technical support to clients, ensuring successful adoption of POS and e-commerce tools.
- Adapted digital platforms to meet individual business needs, emphasizing user experience and system integration.
- Communicated complex system functions in accessible terms to diverse stakeholders across remote settings.

DIRECTOR OF CUSTOMER SUCCESS

Plan A Day Inc | Jan 2023 - Sept 2023

- Led client onboarding, training, and support for a digital scheduling platform serving diverse service-based industries.
- Translated complex technical features into clear, actionable guidance for end users and internal teams.
- Mentored a cross-functional team, promoting collaboration, communication, and user-centered service delivery.

STRATEGY & OPERATIONS PROJECT MANAGER LEAD

DoorDash | Mar 2022 - Nov 2022

- Led end-to-end project execution across cross-functional teams in a fast-paced tech environment, driving alignment from planning through delivery.
- Translated data into actionable insights and communicated project progress to leadership and external stakeholders.
- Streamlined communication and coordination across remote teams, improving workflow efficiency and execution consistency.

EXPERIENCE

E-COMMERCE IMPLEMENTATION ENGINEER

Bbot (acquired by DoorDash) | Jul 2021 - Mar 2022

- Owned onboarding and implementation of SaaS-based e-commerce systems, ensuring successful client adoption and operational readiness.
- Translated complex product features into practical, user-facing guidance for diverse stakeholders.
- Managed client relationships and project workflows, driving communication, problem-solving, and consistent delivery across teams.

PROJECTS

BuildLog App

Created a developer tool that automatically converts GitHub activity into clean, shareable progress updates for professional and developer communities.

Technologies: Flutter Web, GitHub REST API, Netlify Functions, GitHub OAuth

NFC Smart Contact System

Designed and developed a mobile-first digital contact hub that launches instantly via NFC, providing one-tap access to professional information, resumes, portfolios, and contact methods.

Technologies: HTML, CSS, JavaScript, Netlify, Plausible Analytics

GoalCraft

Developed an educator-focused platform that streamlines the creation of high-quality Individualized Education Program (IEP) goals through structured templates, searchable goal banks, and built-in quality checks.

Technologies: Next.js, React, TypeScript, Tailwind CSS
